---

## PROJECTS

### Budget Tracker

- It is a web application which allows user to manage their daily finances. It is made using React. Bootstrap. Node.js, Express and PostgreSQL.
- Github Link: [https://ojhaarch2054/Budget\\_tracker](https://ojhaarch2054/Budget_tracker)

### Quizzify App

- This app was developed in a group for our coursework. It is a quiz app in which user can take quizzes on various topics. The results from the quizzes are stored and the user can find insights on their performance on the quizzes. I worked in the UI design for this project using Bootstrap, HTML and CSS.
- Github link: <https://github.com/Gloryozo/Quizzify>

### Movie App

- This is a complete movie application made using React, Node.js, Express and PostgreSQL and was made in a group as a part of the coursework. The movie app enables users to explore movies, view showtimes, create groups and engage with other users.
- Github link: [https://github.com/Movie-App-Project-OAMK-G15/movie\\_app](https://github.com/Movie-App-Project-OAMK-G15/movie_app)

### Feedback Page

- Created a feedback page using Bootstrap, Node.js, Javascript, Express, and PostgreSQL. The page stores customer details and feedback in a database. Also, the page user can give feedback by text and rating stars.
- Github link: [https://github.com/ojhaarch2054/Feedback\\_page](https://github.com/ojhaarch2054/Feedback_page)

### Contact Manager

- A simple MERN stack website which can serve as a contact manager web application. In this website a user can create new contacts, modify existing contacts, search for contacts and delete contacts. React framework and Bootstrap is used in UI design and Node.js, Express and MongoDB is used in backend.
